# STAR MICRONICS SETS NEW STANDARDS

## JUST TO CITE SOME OF THE MOST IMPORTANT HIGHLIGHTS...

Star Micronics has launched **the highest number of new** products in comparison to any other POS printer manufacturer over the last 12 months - 7 in total.

Star offers the **widest POS printer portfolio** encompassing a range of thermal and matrix printers that effectively meet the needs of both retail and hospitality.

The revolutionary **TSP100 futurePRNT™** series from Star Micronics sets **new standards in POS printing** with software features that enable the creation of purchase-related coupons and which allow receipts to be individually tailored.

Star has developed a **highly innovative portfolio** that includes a number of industry firsts:

-  **the most accessories included at purchase** facilitating immediate installation and use
-  **an entry-level Ethernet printer** that responds to growing demands for fast, long distance and reliable communication - TSP100LAN *futurePRNT*.
-  **the world's first dedicated entry-level Powered USB printer** - TSP100 *futurePRNT* PUSB.
-  **a unique multi-functional printer** capable of printing barcodes, labels, tickets and receipts - TSP700II

Star offers the two **fastest single station POS printers** available today printing at an impressive 250mm/second - TSP100GT *futurePRNT* and TSP700II, as well as a new, **thermal / matrix slip hybrid combination printer, HSP7000** capable of printing at this high speed.

Star effectively responds to the demands of the kiosk marketplace by offering the **widest range of open frame and packaged kiosk printers.**
